---

## Prerequisites

This module was developed for **PrestaShop 1.6+, PS 1.7, PS 8 and PS 9**.

To install the module in your PrestaShop Back Office, make sure your store is running at least version **1.6+**.

You can check this:

- at the top-left next to the PrestaShop logo, or
- in **Menu → Advanced Parameters → Information**.

To install the module, follow the standard PrestaShop installation procedure:

- Go to **Modules Manager → Add a new module**
- Upload the **.zip** file
- Once uploaded, the module will appear in the module list and can be configured from there.

A **Colissimo contract** is required to activate and use the module.

You will need to retrieve your **API key** to connect the module.

---

## Overall Structure of the Colissimo Module

When entering the module configuration, the merchant sees a **header** with several menu entries.

These entries are described below.

---

### Header

## Orders

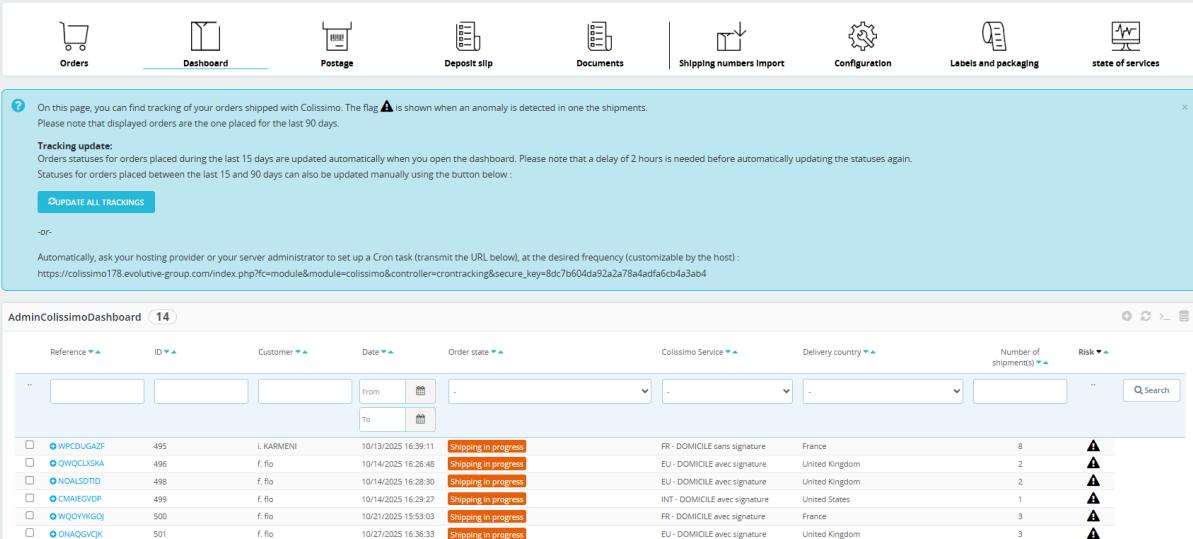

The **Orders** entry redirects the merchant to the page where all orders shipped with a Colissimo carrier are listed.

This link leads to the **PrestaShop Orders menu**, on the “**Colissimo**” page.

From this page, you can associate orders with a Colissimo carrier by clicking “**Assign orders to Colissimo**”.

## Dashboard

The **Dashboard** allows you to track your Colissimo shipments.  
You can view all shipped orders with their shipment details.

On this page, you can find tracking of your orders shipped with Colissimo. The flag **⚠** is shown when an anomaly is detected in one of the shipments.

Please note that displayed orders are the ones placed for the last 90 days.

**Tracking update:**  
Orders statuses for orders placed during the last 15 days are updated automatically when you open the dashboard. Please note that a delay of 2 hours is needed before automatically updating the statuses again.  
Statuses for orders placed between the last 15 and 90 days can also be updated manually using the button below :

**UPDATE ALL TRACKINGS**

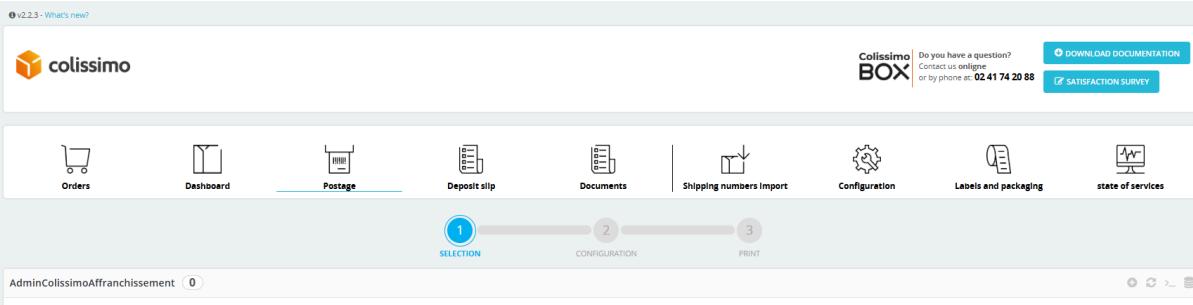

Automatically, ask your hosting provider or your server administrator to set up a Cron task (transmit the URL below), at the desired frequency (customizable by the host) :  
[https://colissimo178.evolutive-group.com/index.php?fc=module&module=colissimo&controller=ctrondtracking&secure\\_key=8dc7b604da92a2a78a4adfa6cbfa3ab4](https://colissimo178.evolutive-group.com/index.php?fc=module&module=colissimo&controller=ctrondtracking&secure_key=8dc7b604da92a2a78a4adfa6cbfa3ab4)

## Labels & Packaging

Redirects to the Colissimo website to purchase label and packaging consumables.

## Service Status

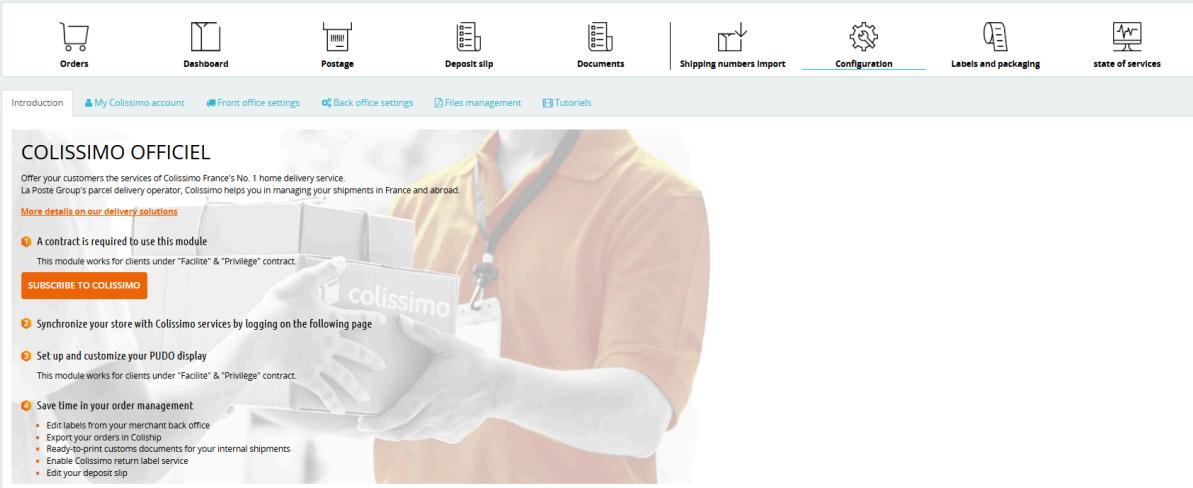

Redirects to the Colissimo website to check whether Colissimo services are operational.

# Module Configuration

# Introduction

This is the entry point of the module configuration.

It presents the Colissimo service and allows subscription to the Colissimo offer.

The screenshot shows the 'COLISSIMO OFFICIEL' section of the module configuration. It features a large image of a delivery person in an orange shirt and white gloves holding a white Colissimo box. Below the image, there are four steps to 'SUBSCRIBE TO COLISSIMO': 1. Synchronize your store with Colissimo services by logging on the following page. 2. Set up and customize your PUDO display. 3. Save time in your order management.

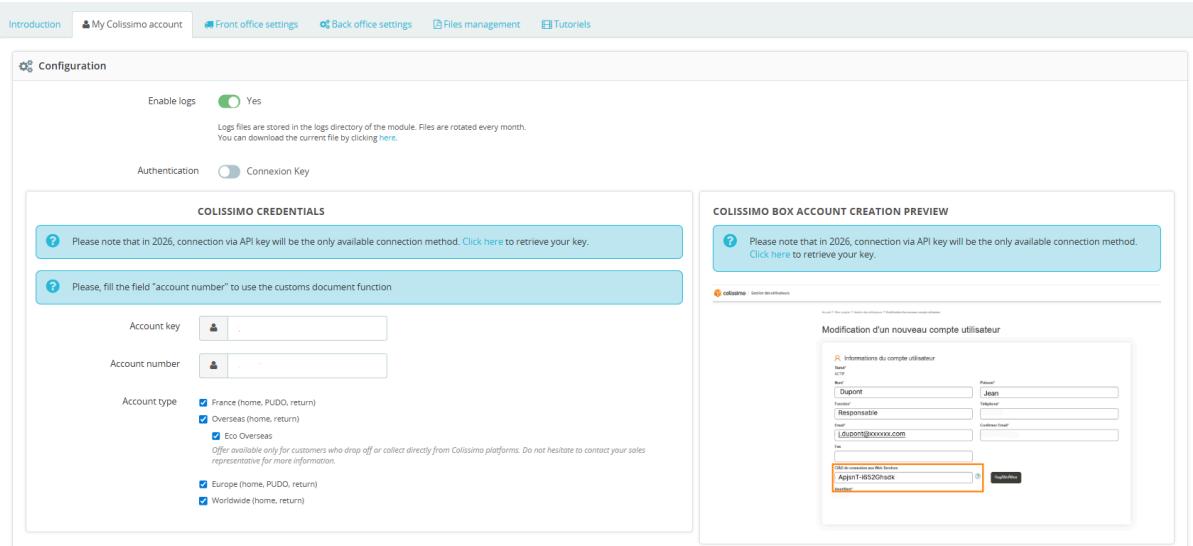

- Offer your customers the services of Colissimo France's No. 1 home delivery service. La Poste Group's parcel delivery operator, Colissimo helps you in managing your shipments in France and abroad.
- More details on our delivery solutions**
- 1 A contract is required to use this module**  
This module works for clients under "Facilite" & "Privilege" contract.
- 2 SUBSCRIBE TO COLISSIMO**
- 3 Synchronize your store with Colissimo services by logging on the following page**
- 4 Set up and customize your PUDO display**  
This module works for clients under "Facilite" & "Privilege" contract.
- 5 Save time in your order management**
  - Edit labels from your merchant back office
  - Export your orders in Colisip
  - Ready-to-print customs documents for your internal shipments
  - Enable Colissimo return label service
  - Edit your deposit slip

## My Colissimo Account

This section allows you to link your PrestaShop module to your Colissimo account.

Logs allow support tracking.

Authentication (API key) lets you enter your **account key** and **account number** to enable services.

The screenshot shows the 'Configuration' tab with two main sections: 'COLISSIMO CREDENTIALS' and 'COLISSIMO BOX ACCOUNT CREATION PREVIEW'.

**COLISSIMO CREDENTIALS:**

- Enable logs: Yes (checkbox)
- Logs files are stored in the logs directory of the module. Files are rotated every month. You can download the current file by clicking [here](#).
- Authentication: Connexion Key (checkbox)
- COLISSIMO CREDENTIALS:**
  - Please note that in 2026, connection via API key will be the only available connection method. [Click here](#) to retrieve your key.
  - Please fill the field "account number" to use the customs document function.
  - Account key:
  - Account number:
  - Account type:
    - France (home, PUDO, return)
    - Overseas (home, return)
    - Eco Overseas
    - Offer available only for customers who drop off or collect directly from Colissimo platforms. Do not hesitate to contact your sales representative for more information.
    - Europe (home, PUDO, return)
    - Worldwide (home, return)

**COLISSIMO BOX ACCOUNT CREATION PREVIEW:**

- Please note that in 2026, connection via API key will be the only available connection method. [Click here](#) to retrieve your key.

## Front Office Settings

This section configures what will be displayed to your customers on the storefront.

### Settings

#### Active delivery duty paid

Allows you to anticipate customs fees for certain destinations.

You can define **three different tariffs** which will be added to shipping costs and charged to the customer at checkout.

#### Active Door Codes

Displays fields on the storefront so customers can enter building access codes, which will be printed on the label.

#### Weight Colissimo prices

Allows you to apply a surcharge to the shipping prices displayed on the storefront.

**Settings**

Active delivery duty paid  Yes

Since 29/08, the United States requires customs duties to be paid by the exporter (and no longer by the recipient), which means that shipments must be sent exclusively with the DDP (Delivered Duty Paid) option: customs duties on items must be paid to US Customs before these items enter the United States

|                         |  |
|-------------------------|--|
| Default DDP cost        | 18   |
| GB DDP cost             | 10   |
| USA DDP cost            | 6  |
| Activate door codes     | <input checked="" type="checkbox"/> Yes                                  |
| Weight Colissimo prices | <input checked="" type="checkbox"/> Yes                                  |
| Weighing type           | <input type="radio"/> Percentage <input checked="" type="radio"/> Amount |
| Amount                  | EUR 0  |

## Postage Settings

### Use a default tare weight

This option allows you to define a default weight for each Colissimo parcel

### Default insurance for all shipments

Define whether insurance should be applied to each parcel by default

### Secure delivery code

This option can be enabled or disabled depending on your contract (check with your Colissimo sales representative)

It secures shipments with a delivery code

You can define the price thresholds for which the code is required

**Postage settings**

By default, the price range is between 0€ and 100.000€. If you have not entered a value for the secure code option then the price range will take the default values.

Use a default weight tare:  Yes  No

Default weight tare: 2 kg

Default insurance for all your shipments:  No  Yes

Secure code on delivery:  No  Yes

Minimum order value: 0 EUR

Maximum order value: 100000 EUR

## Return Label Settings

### Enable Colissimo returns

Enable returns

## Create a return label for each order

The return label will be automatically created for each shipment

## Make the return label available in the customer account

This option allows customers to find their Colissimo return label in their customer area

## Allow customers to generate return labels from their account

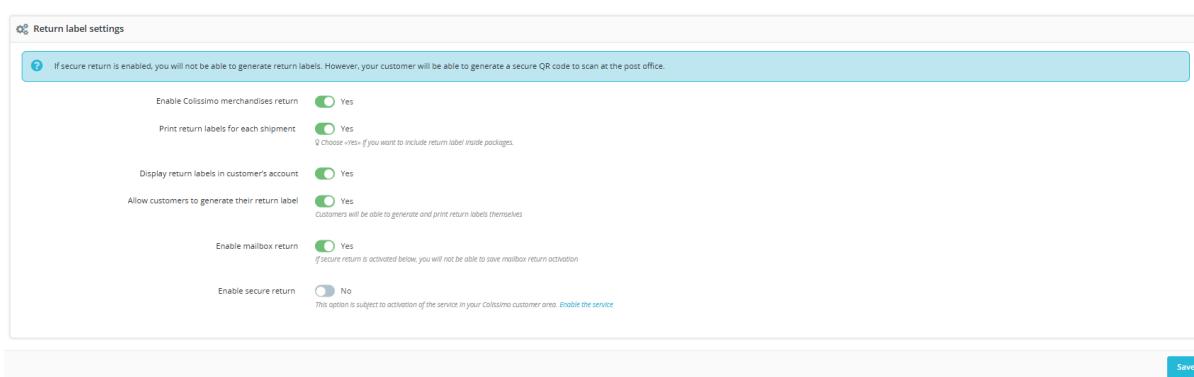

This option prevents automatic creation and lets customers generate the return label themselves

## Enable mailbox return

The Colissimo agent can collect the parcel from the customer's mailbox

## Enable secure return

Provides a secure code for return shipments

If secure return is enabled, you will not be able to generate return labels. However, your customer will be able to generate a secure QR code to scan at the post office.

Enable Colissimo merchandises return  Yes

Print return labels for each shipment  Yes  Choose yes if you want to include return label inside packages.

Display return labels in customer's account  Yes

Allow customers to generate their return label  Yes  customers will be able to generate and print return labels themselves

Enable mailbox return  Yes  If secure return is activated below, you will not be able to save mailbox return activation

Enable secure return  No  This option is subject to activation of the service in your Colissimo customer area. [Enable the service](#)

## Files Management

In this form, you can configure how often the document deletion alert is displayed.

This allows you to regularly free up disk space based on the number of documents generated.

The default settings correspond approximately to a volume of 50 orders per day, so the alert appears every 15 days.

The alert will be visible on the **Colissimo Shipping** page.

In this form, you can configure when to display an alert to delete documents. It allows you to free some space periodically depending on the quantity of documents you create. Default settings correspond approximately to a volume of 50 orders per day so the alert shows up every two weeks. The alert will be shown on the Colissimo Postage page.

Number of files triggering the alert  files

Documents lifetime  days

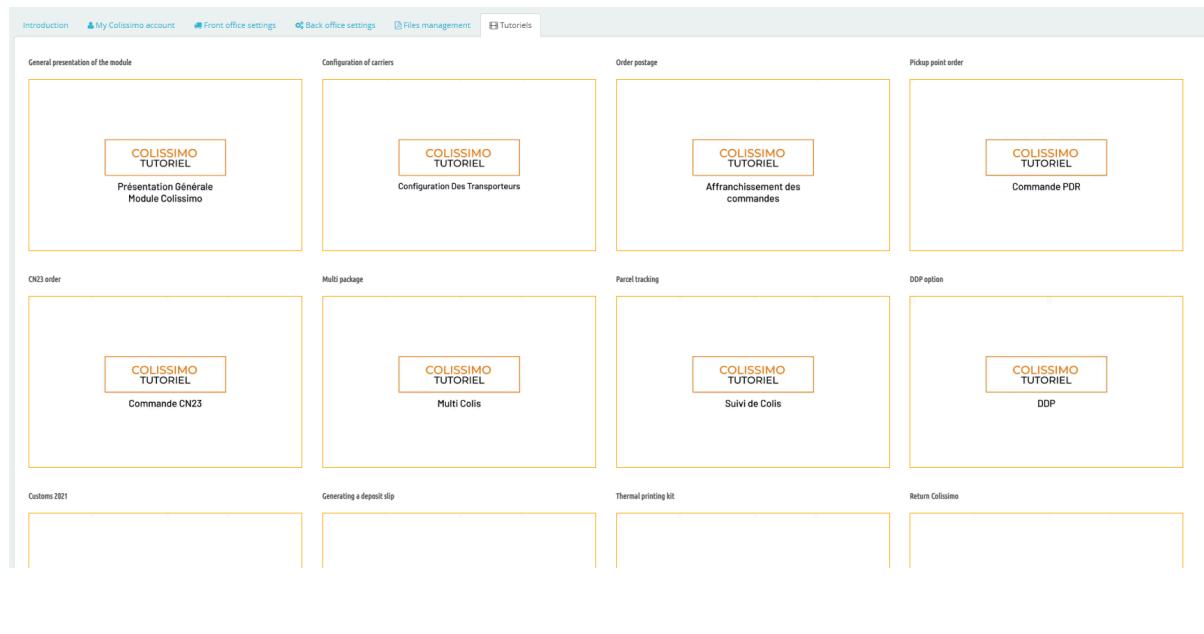

Documents dating more than this number of days will be deleted.

Disk usage of documents directory **13 MB (135 files)**
