colissimo

Create your own labels thanks to a 100% integrated solution

Do you produce a large number of labels on a regular basis, want to save time and have no further need to call Colissimo Web Service?

Our new local Web Service solution for printing labels is designed specifically to meet your needs.
Ready for direct integration into your IT system, it enables you to print your own labels.

1 | 100% autonomy, flexibility and speed

- ✓ **No need to call our web service** each time you print a label: a real time saving!
- ✓ **No more reliance on Colissimo servers** and 3 days' autonomy if our services are unavailable.
- ✓ Label layouts **updated permanently** and 100% Geolabel compatible (option to send parcels in France or abroad).
- ✓ **Simple installation**, no requirement for complex infrastructure, no excess postage costs.

2 | A more reliable, simpler solution providing improved performance

- ✓ **Installation on multiple virtual machines:** your label printing is even safer and faster.
- ✓ **Easy-to-steer** thanks to the real-time visualisation of your solution (utilisation, performance, levels of your web services) and the customisation of your interface.
- ✓ **Improved risk management.** Repeat postage tests, automatic sending of emails in the event of a breakdown, real-time visualisation of the vital parameters of the machines.

3 | Installation, user guide

- ✓ **Our IT team is at your side** to present the details of the solution to you and support you with its deployment.
