## I. PURPOSE

The purpose of this document is to outline the method for developing the CN 23 customs declaration.

CN 23: this customs declaration is essential for shipping parcels to the French overseas departments as well as any other non-EU countries (including Andorra).

It must be printed out in A4 format.

## II.2 Instructions:

---

- Parcels can be one of the following: commercial sample, documents, gift, returned goods or other; tick the appropriate box(es)
- Provide up to 15 article lines per CN 23
- The value for "Total in EUR" should be the total amount of the Value EUR column \* Qty
- The country of origin code should be written out in full
- Write the parcel No. underneath the parcel barcode
- The customs reference (if any) is allocated by French Customs

## III. APPLICATION

### III.1 General information

---

#### Copies to be issued:

- ➔ 4 hard copies of the CN 23 customs declaration (A4 format), to be provided with 2 hard copies of the invoice (sales or pro forma), in a transparent plastic wallet affixed to the parcel.

### III.2 CN 23 customs declaration hard copy

---

**4 hard copies** must be provided in a transparent plastic wallet affixed to the parcel, which must also contain 2 hard copies of the invoice (sales or pro forma), for items being sent to the **French overseas departments and non-EU countries**.

**To obtain an export tax receipt, a hard copy of the CN 23 customs declaration must be kept by the sender and validated by the date stamp provided by La Poste**

See Appendix A for an example.

### III.3 CN 23 with incorporated CN 11 copy

---

**If using a Colissimo Domicile product - with or without signature OM (7A / 7Q / 8Q / 9B / 9D / 9W) - for the DOM (excluding Mayotte) only with the Free of Duties and Charges option, the CN11 form must be incorporated with the CN23 form.**

See Appendix B for an example.

## IV. GENERATECN23 METHODE

This method is used to generate a CN23 for products that require CN23. It is exposed to external customers and the OSC application (Parcel Tracking Tool)

The paragraphs below describe the data to be entered for the generateCN23 transaction.

### IV.1 Requests

Parameters of the string type whose length exceeds the allowed length will be truncated to the right.
