I. Introduction

I. 1 Purpose of the document

This document is an appendix to the technical document on the Franking Web Service which deals with printing delivery slips.

The delivery slip is only mandatory for destinations requiring a CN 23 customs declaration.

Customers have several options for editing this document:

- Via their own means based on the model provided in this document.
- Via the Back-Office, if the option was requested from your sales representative (only for certain products).
- Via the Web Service operations described in this document:

Operation	Description
<code>generateBordereauByParcelsNumbers</code>	Generate a delivery slip using a list of parcel numbers
<code>getBordereauByNumber</code>	Re-print a delivery slip

Important: when using these methods, the parameters must be entered in the order defined in the wsdl, otherwise an "unmarshalling error" will be returned.

I. 2 Access

Delivery slip printing methods are accessible at the following address:

SOAP : <https://ws.colissimo.fr/sls-ws/SlsServiceWS/2.0?wsdl>

REST : <https://ws.colissimo.fr/sls-ws/SlsServiceWSRest/2.0? wadl>

This service requires you to use your La Poste - Colissimo contract number and your password which you may receive by email when starting your contract or request from your usual La Poste - Colissimo sales contact. The login details also enable you to access your customer web account at <https://www.colissimo.fr/entreprise>

Please refer to the main technical document (Colissimo Franking Web Service specifications) for the following aspects:

- Coding of formats
- Coding of conditions
- Managing accented characters
- Format and processing of the response from the Web Service
- Error Codes

II. Printing using a list of parcel numbers: "generateBordereauByParcelsNumbers"

This method is used to generate a delivery slip using a list of parcel numbers.

II. 1 Input parameters

Field name	Mandatory	Description
ContractNumber	x	Account number.
Password	x	Password
generateBordereauParcelNumberList	x	List of parcel numbers

II. 2 Response

Field name	Description
BordereauResponse	
Delivery slip	Delivery slip subject
Deliver note description	
Description	
Field name	Description
bordereauDataHandler	PDF file
bordereauHeader	Delivery slip information
Description bordereauHeader	
Field name	Description
bordereauNumber	Delivery slip number
publishingDate	Delivery slip publishing data

numberOfParcels	Number of parcels
codeSitePCH	Code of processing site
nameSitePCH	Name of processing site
clientNumber	Client number
Address	Shipping address
Company	Company name

II. 3 Examples

Example of a SOAP request

- XML input request using the generateBordereauByParcelsNumbers method

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:sls="http://sls.ws.coliposte.fr">
  <soapenv:Header/>
  <soapenv:Body>
    <sls:generateBordereauByParcelsNumbers>
      <contractNumber>?</contractNumber>
      <password>?</password>
      <generateBordereauParcelNumberList>
        <parcelsNumbers> 9D00000122757</parcelsNumbers>
      </generateBordereauParcelNumberList>
    </sls:generateBordereauByParcelsNumbers>
  </soapenv:Body>
</soapenv:Envelope>
```

- XML output response from the generateBordereauByParcelsNumbers method

```
<soap:Envelope xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Body>
    <ns2:getBordereauByNumberResponse xmlns:ns2="http://sls.ws.coliposte.fr">
      <return>
        <messages>
          <id>0</id>
          <messageContent>La requête a été traitée avec
succès</messageContent>
          <type>INFOS</type>
        </messages>
        <bordereau>
          <bordereauDataHandler>
            <xop:Include href="cid:868e1b08-45b6-477f-9c0f-0471dafd6bea-
220@cxf.apache.org" xmlns:xop="http://www.w3.org/2004/08/xop/include"/>
          </bordereauDataHandler>
          <bordereauHeader>
            <address>17 AV BOUISSON FERNAND</address>
            <bordereauNumber>31</bordereauNumber>
            <clientNumber>100178</clientNumber>
            <codeSitePCH>999999</codeSitePCH>
            <company>NOM-100178</company>
            <numberOfParcels>764</numberOfParcels>
```

```

        <publishingDate>2016-08-02T15:18:35+02:00</publishingDate>
    </bordereauHeader>
</bordereau>
</return>
</ns2:getBordereauByNumberResponse>
</soap:Body>
</soap:Envelope>

```

Example of a REST request

- XML input request using the generateBordereauByParcelsNumbers method

```

{
  "contractNumber": "?",
  "password": "?",
  "generateBordereauParcelNumberList": {
    "parcelsNumbers": [
      "6A19660344355", "6A19662941699"
    ]
  }
}

```

- XML output response from the generateBordereauByParcelsNumbers method

```

<data contentType="multipart/mixed; boundary="uuid:715937ac-efdb-4ada-97ac-3d5a87d21549"; charset=UTF-8"
contentLength="326"><![CDATA[{"messages":[{"id":"50031","type":"ERROR","messageContent":"Numéro de colis invalide 6A19660344355"}],"bordereauHeader":null}]]></data>

```

III. Re-printing using a delivery slip number: "getBordereauByNumber"

This method can be used to re-print using a delivery slip number.

III. 1 Input parameters

Field name	Mandatory	Description
ContractNumber	x	Account number.
Password	x	Password

bordereauNumber	x	Delivery slip number
------------------------	----------	-----------------------------

III. 2 Response

Field name	Description
BordereauResponse	
Delivery slip	Delivery slip subject
Deliver note description	
Field name	Description
bordereauDataHandler	PDF file
bordereauHeader	Delivery slip information
Description bordereauHeader	
Field name	Description
bordereauNumber	Delivery slip number
publishingDate	Delivery slip publishing data
numberOfParcels	Number of parcels
codeSitePCH	Code of processing site
nameSitePCH	Name of processing site
clientNumber	Client number
Address	Shipping address
Company	Company name

III. 3 Examples

- XML input request using the `getBordereauByNumber` method

```

<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:sls="http://sls.ws.coliposte.fr">
  <soapenv:Header/>
  <soapenv:Body>
    <sls:getBordereauByNumber>
      <contractNumber>100000</contractNumber>
      <password>colisxxxx</password>
      <bordereauNumber>31</bordereauNumber>
    </sls:getBordereauByNumber>
  </soapenv:Body>
</soapenv:Envelope>

```

- **XML output response using the getBordereauByNumber method**

```

<soap:Envelope xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Body>
    <ns2:getBordereauxByDatesResponse xmlns:ns2="http://sls.ws.coliposte.fr">
      <return>
        <messages>
          <id>0</id>
          <messageContent>La requête a été traitée avec succès</messageContent>
          <type>INFOS</type>
        </messages>
        <bordereaux>
          <bordereauDataHandler>
            <xop:Include href="cid:868e1b08-45b6-477f-9c0f-0471dafd6bea-200@cxf.apache.org" xmlns:xop="http://www.w3.org/2004/08/xop/include"/>
          </bordereauDataHandler>
          <bordereauHeader>
            <address>17 AV BOUISSON FERNAND</address>
            <bordereauNumber>29</bordereauNumber>
            <clientNumber>100178</clientNumber>
            <codeSitePCH>999999</codeSitePCH>
            <company>NOM-100178</company>
            <numberOfParcels>98</numberOfParcels>
            <publishingDate>2016-07-15T13:52:24+02:00</publishingDate>
          </bordereauHeader>
        </bordereaux>
      </return>
    </ns2:getBordereauxByDatesResponse>
  </soap:Body>
</soap:Envelope>

```

IV. Description of the delivery slip

Presentation example:

SITE DE PRISE EN CHARGE : XXXXXX		BORDEREAU DE REMISE Offre Entreprises Colissimo

POID TOTAL DE COLIS : XX						
Nombre de page : 1		Page n°1				

Detailed contents of the delivery slip :

Document title	"Colissimo Business Offer delivery slip"
Processing site:	Identification code (REGATE) of the processing site (6 numeric characters) → allocated to the customer
Processing site name:	Name of the processing site in plain text (40 alphabetic characters), provided by the sales contact person.
Note No.	Sequential delivery slip number (this number must be continuous) (10 numeric characters)

Date:	Note issue date: Note issue date (DD/MM/YYYY). La Poste - Colissimo considers this date to be the date on which the parcel is physically handed over Important: this date must match the actual date the parcel was dropped off at the traffic entry site.
Customer No.	Customer identifier; 6-character Customer No. provided by La Poste - Colissimo
Sender ref.:	Shipment identifier No. of the parcel in your own system (optional) [35 alphanumeric characters].
Addressee's Name and Address:	The Name and Address of the end customer (optional).
Parcel No.:	Full parcel number sorted in ascending order.
POSTC	Post code
CCODE	Country code
Weight:	Weight of parcel in kg (< or = 30 kg).
NM:	Fill in zone with "1" if the parcel is not machineable or with "0" if it is machineable
Page parcel number	Total number of parcels listed on the page
Weight of parcels listed on the page	Total weight of parcels listed on the page
Total number of parcels	Total number of parcels listed on the delivery slip and handed over to La Poste - Colissimo.
Total weight of parcels	Total weight of parcels listed on the delivery slip and handed over to La Poste - Colissimo.
Number of pages	Total number of pages of the delivery slip
RESERVED ZONE	Keep a zone clear for the La Poste - Colissimo agent's signature and Date Stamp.
Page:	Current page No. out of total pages, or page No. with the term "last page" noted on the last page.

V. Contact

Report an incident, need technical support

Open a ticket to technical support independently from the online tool **on Colissimo Box**

Or

+33(0) 241 742 088

From monday to friday (excluding public holidays) from 8am to 6pm

-
- Operational problems after integration of a technical solution
 - Breakdown, anomaly or incident on one of the applications in your customer area
(Parcel Tracking Tool, ColiShip, Colissimo Returns)
 - Support to the deployment of a technical solution
 - ColiShip support

You'll obtain a ticket number for each processed request
